01/12/2017	Certification of Achievement, Women LEAD Nepal's School Leadership Program held at Champion Academy.

Projects

Task Manager

- Developed a full-stack task management system using Laravel, handling CRUD operations for tasks and users.
- Implemented task assignment, progress tracking, and status updates to improve team workflow efficiency.
- Created a responsive front-end interface ensuring seamless usage across desktop and mobile devices.
- Implemented user authentication and role-based access control to ensure secure task management.

HamroMechanics

- A cross-platform mobile app that connects customers with mechanics and enables location tracking and service coordination using React Native and Django.
- Integrated live geolocation features using React Native Maps for two-way tracking.
- Implemented JWT-based authentication with role-based access control (Customer, Mechanic) to secure user sessions and route access.
- Utilized Sqlite for structured data storage in Django for data exchange.
- Used version control with Git to streamline development and deployment processes.

E-governance Website

- Developed a full-stack e-Government Project Management System using React.js and Node.js with Express for real-time tracking of publicly funded projects.
- Designed and implemented RESTful APIs to manage government projects, including creation, listing, and updates with MongoDB for persistent storage.
- Built secure role-based access controls to differentiate between government authorities and general users.
- Used Tailwind CSS and component-based architecture to build an intuitive and responsive UI.

Certification

- React Js Awarded by Sikaai IT.
